

Fawn & Deer Revival

Critical Care for Cervids

When fawns get sick, fast action is necessary to help avoid costly death loss. Fawn & Deer Revival™ is designed to provide rapid support to the critically ill fawn and aid in the fight to survive.

Fawn & Deer Revival is a specifically formulated combination of new and proven technologies, including ImmWave®, Encrypt®, targeted egg proteins, micro-encapsulated beneficial bacteria, Vitamin B complex and Vitamin D3. This all-natural paste targets harmful pathogens in the gut and delivers components directly into the bloodstream, enhancing the response of the immune system to help jump-start recovery.

In addition, Fawn & Deer Revival can be used post-tranquilization to help speed recovery and as an aid during times of stress or illness.

Fawn & Deer Revival Contains The Following Features and Benefits

⊕ ImmWave

- A novel technology that delivers potent, select milk proteins designed to give an immediate boost to the immune system and aid in the fight to survive.

⊕ Encrypt

- Aids in inhibiting growth of pathogens, including cryptosporidia, and absorbs harmful toxins.
- Helps reduce gut pH, creating a less favorable environment for digestive pathogens that can cause scours.

⊕ Targeted Enzyme Package

- Designed to boost metabolic activity to help provide crucial nutrients in the battle to fight off disease.

⊕ Beneficial Lactic Acid Producing Bacteria

- Helps re-establish intestinal balance and aids in the reduction of pathogen-induced diarrhea.
- Micro-encapsulated to protect beneficial bacteria from stomach acid and bile.

⊕ Optimized Vitamin and Mineral Complex

- Contains Antler D™, a more readily available source of Vitamin D3 that is more rapidly absorbed. Vitamin D3 is critical for immune system activation.

Fawn & Deer Revival comes in a convenient 15 gm dial-a-dose tube offering easy dosing flexibility for fawns, young and adult deer.
